

VERADERM SALINE EYE WASH SPRAY

VERADERM[®]

STERILE EYE WASH SPRAY

Advantages

- Buffered saline solution that approximates the pH of the human eye at ambient temperatures (typically 60-100° F)
- It is buffered to the same pH as the human eye, which is especially important in the case of chemical splashes, when the eye's pH is disrupted.
- Because it utilizes a physiologically correct saline solution that is similar to human tears, it can be used for a full 15 minutes without irritation to the eye.
- Sterile saline solution maintains its stable pH during all stages of use, including storage and flushing.
- Helps remove non-toxic floating foreign bodies and relieves eye irritation due to pollen and dust particles
- This sterile solution is designed for the cleansing and relief of fatigued or irritated eyes caused by exposure to chlorinated water, foreign materials, dust, smog, smoke, pollen, wind, and other air pollutants.
- Easy to use, just spray, allowing the solution to thoroughly bathe the eye.

Other Advantages

- Maintains sterility for 3 years
- Container can be used in all directions
- No Preservatives
